

Emilie Barbattini

Lakewood, CO | ebarbattini@icloud.com | 970.889.9594 | linkedin.com/in/emilie-barbattini

Data engineer with experience building scalable ETL pipelines, optimizing PostgreSQL queries, and managing large-scale data archives. Skilled in Python, Airflow, CI/CD workflows, and dashboarding to deliver actionable insights. Dedicated to enabling smarter, data-driven decision-making across organizations.

EDUCATION

UNIVERSITY OF COLORADO | Boulder, CO

Bachelor of Science, Information Science — Minor, Atmospheric and Oceanic Sciences

- GPA 3.9 – **Dean's List** – College of Media, Communication, and Information
- Relevant Coursework: Python I&II, Statistics, SQL, Information Visualization, Web Data Science, Web Design

PROFESSIONAL EXPERIENCE

DATA ENGINEER

June 2026– Present

ASSOCIATE DATA ENGINEER

June 2025– May 2026

Techstars | Denver, CO

- Building and maintaining **scalable ELT pipelines** with **Apache Airflow** and in-house tooling, using CI/CD practices to ensure reliable, automated data ingestion and transformation.
- Diagnosing and resolving **Python** and data pipeline failures, strengthening reliability by addressing edge cases and ensuring smooth execution of scheduled workflows
- Optimizing **PostgreSQL** queries and data models to boost dashboard performance, giving internal stakeholders faster and more accurate reporting.
- Collaborating with cross-functional engineering teams to deliver high-quality data solutions for **Salesforce and internal applications**.

DATA MANAGER

NOAA's National Center for Environmental Information | Boulder, CO

November 2023– May 2025

- Stewarded a **320 terabyte and growing** archive of scientific data on cloud platforms and tape storage, utilizing Linux OS to adapt to new data types and maximize ingest efficiency.
- Developed and troubleshooted **automated Python scripts** to improve data pipeline efficiency.
- Managed an **Oracle SQL database**, logging dataset metadata and ensuring comprehensive and accessible records.
- Collaborated with colleagues and customers to fulfill data requests via cloud services, hard drives, and FTP servers.

DATA ANALYTICS INTERN

Trinity Access Programmes, Trinity College Dublin | Dublin 2, Ireland

June 2023 – August 2023

- Independently processed and cleaned several hundred gigabytes of quantitative student data from approximately **50 secondary schools and universities** using intelligence programs such as Qualtrics and Excel.
- Designed dynamic and interactive data visualizations in **Tableau** to assess outreach intervention effectiveness, integrate student and teacher feedback, and present insights in an engaging and comprehensive format.
- Partnered with analysts and educators to present findings to department heads, **facilitating discussions** on outreach programs and their **impact across different demographics**.

KEY SKILLS & INTERESTS

Languages & Tools: Python (Airflow, OOP, ELT), SQL/PostgreSQL, Bash, Git, JavaScript/React, HTML/CSS

Data Engineering: Airflow DAGs, CI/CD workflows, pipeline debugging, query optimization, API & Salesforce integrations

Cloud & Systems: AWS, GCP, Linux

Visualization & Reporting: Tableau, Power BI, Python (Matplotlib, Altair, Seaborn), dashboard optimization

Data Management: Metadata handling, monitoring & logging

Professional Skills: Attention to detail, Technical Presentation, Project Management, Analytical Problem Solving
